

# UKRISS

UK RESEARCH INFORMATION SHARED SERVICE

# UKRISS Core Information Reporting Profile, Harmonisation, CERIF, euroCRIS, CASRAI

Brigitte Joerg PhD, euroCRIS, JeiBee Ltd.

# The Project

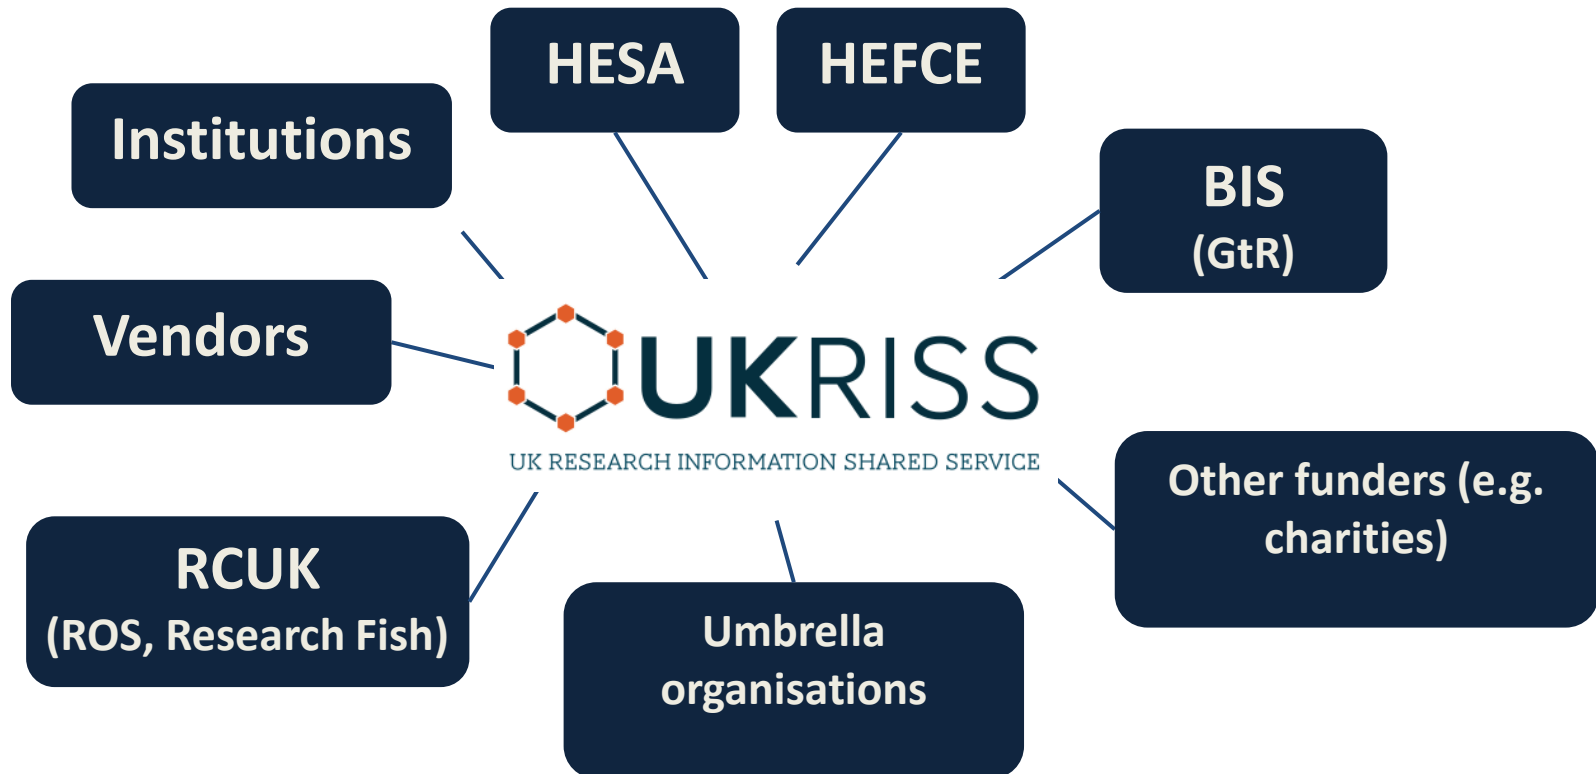

- **Duration**
- 16 month: March 2012 – June 2013  
-> **Extension** until December 2013
  
- **Funding**
- JISC – Research Information Management Programme
  
- **Structure**
- **Phase 1:** Requirements and Recommendations
- Feasibility Study November 22<sup>nd</sup>, publicly released January 2013
- **Phase 2:** Proof-of-Concept, Sustainability
  
- **Partners**
- King's College London (lead), British Library, Brunel University, Cottage Labs, Exeter University, euroCRIS, University of Edinburgh (unfunded)

# Objectives

- Explore feasibility and proof-of-concept delivery of a national shared service for reporting of research information
- Increase the flow of research information around the sector whilst reducing the burden of research reporting on individual researchers and institutions

# Requirements Study

- Based on 41 Interviews across the sector
- Final list of 231 requirements

# Feasibility Study Key Findings

- **Fragmented reporting landscape**
  - Lack of alignment of information requests to institutions
- **Burden on institutions (PIs and administrators)**
  - Duplication and lack of automation
- **Data quality and reporting compliance issues**
- **Limited reuse of research information**
  - Limits strategic planning and business intelligence

# Background

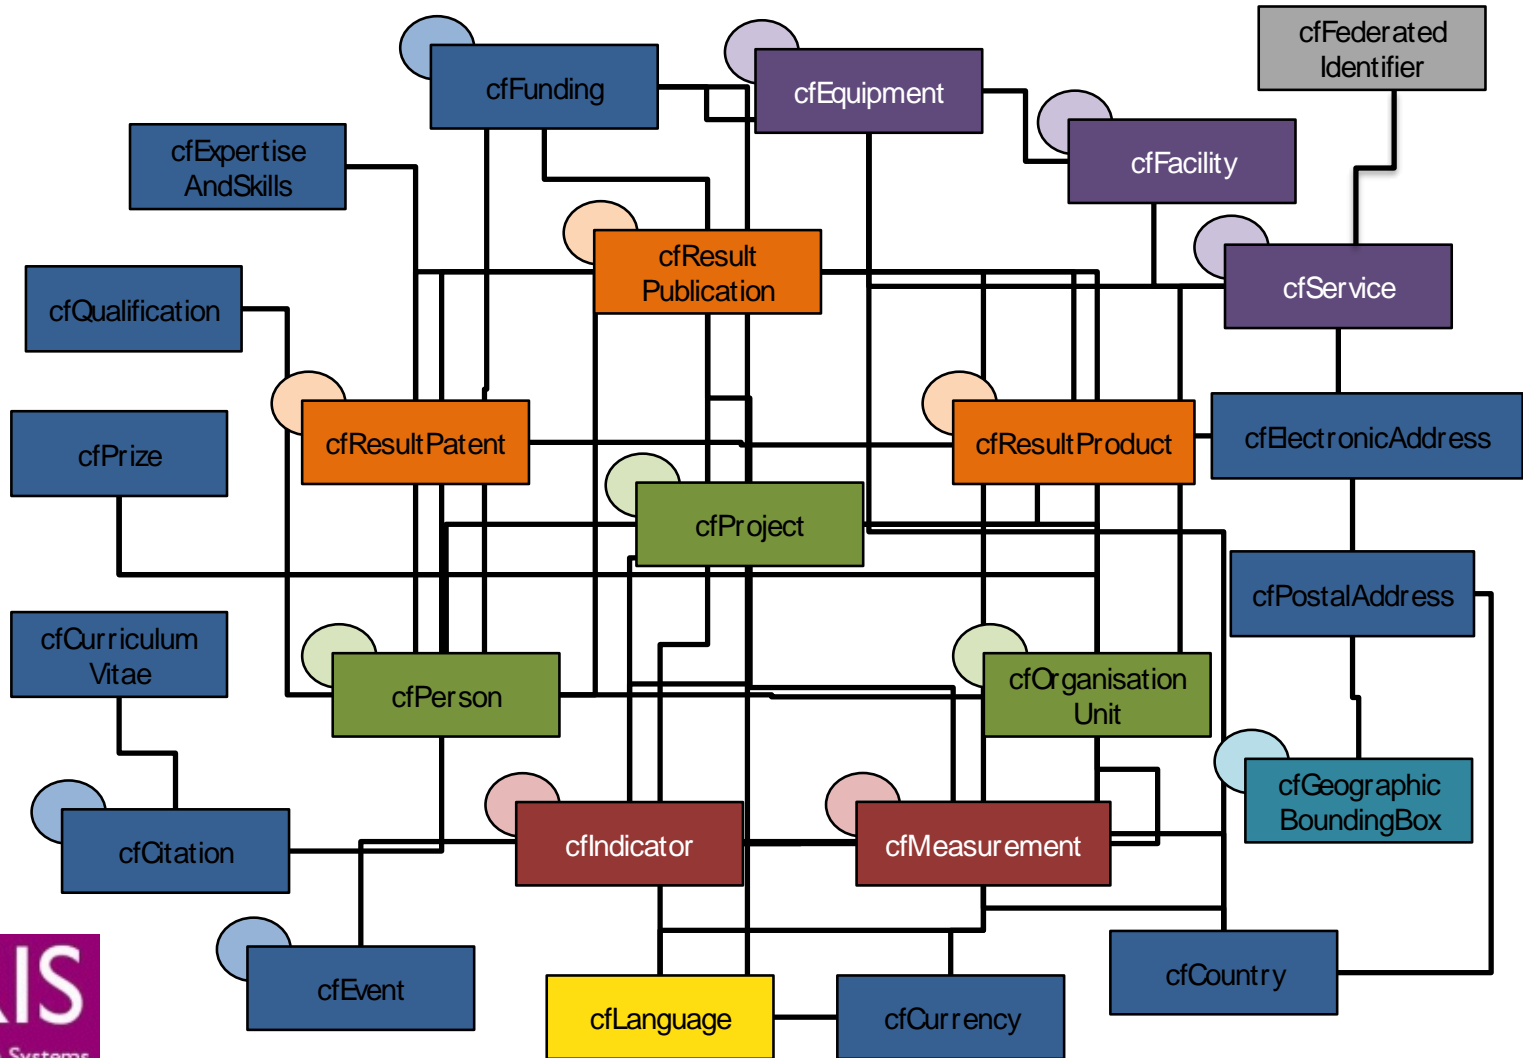

- CERIF
  - Standard for representation of research information
- JISC EXRI-UK report (2009)
  - Recommended adoption of CERIF across UK HE sector
- JISC report (2010) – Business case for CERIF
  - Reduction in complexity and administrative effort
- JISC report (2012) – Adoption of CERIF in UK HEIs
  - 51 UK institutions have a CERIF-compliant CRIS (30%)
- Outputs systems
  - ROS - Research Outputs System (RCUK), Research Fish, Gateway to Research (BIS)
- JISC projects
  - (IRIOS 1&2, RMAS, CERIF in Action, Readiness for REF, MICE, DESCRIBE, BRUCE)
- International perspective
- HESA Information Landscape Report (2012)

– CERIF –

Common European Research Information Model

**A Formal Metadata Model**

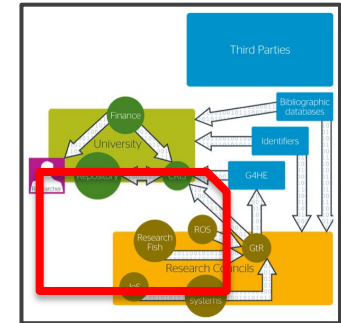

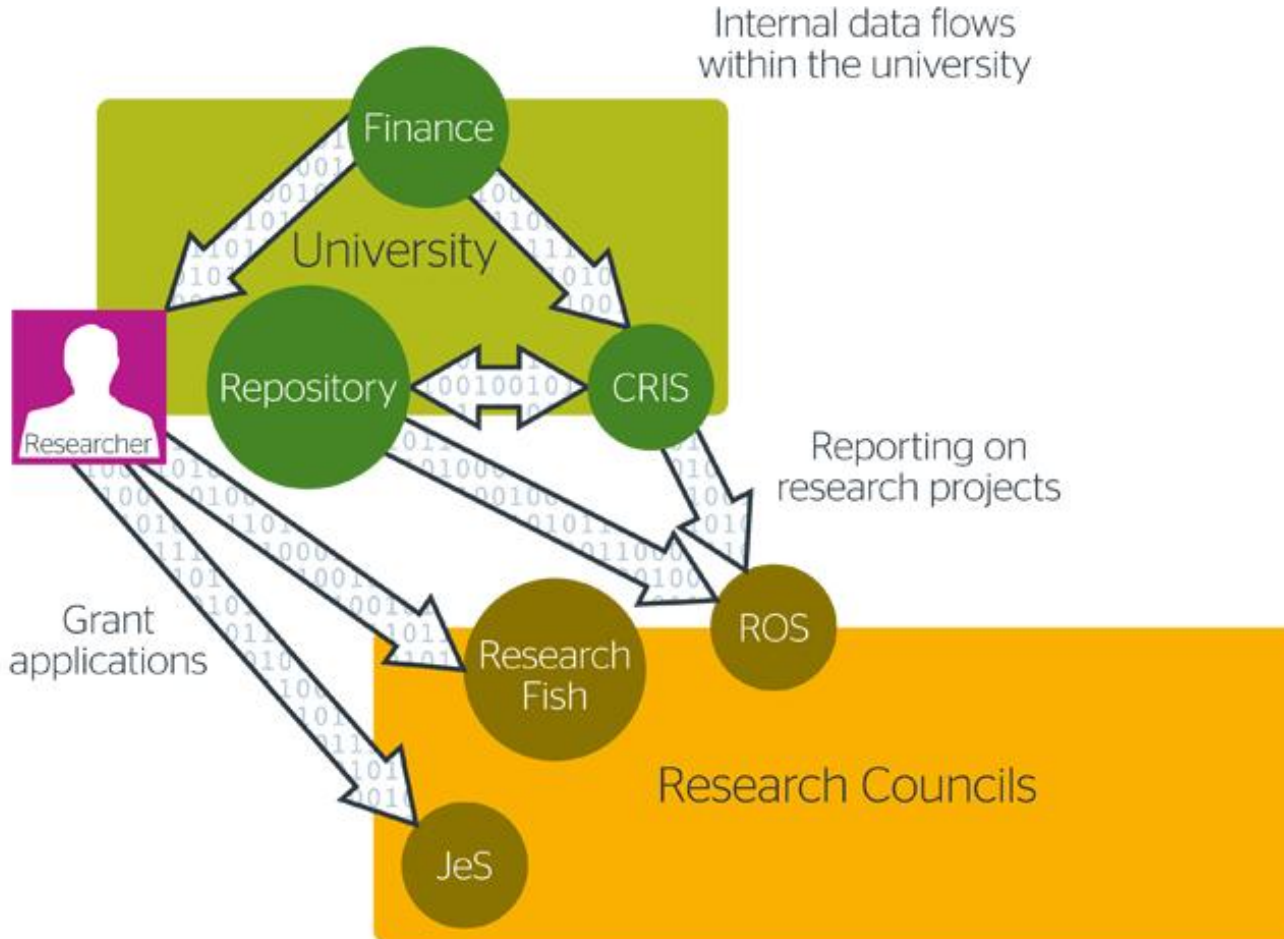

# Phase 2 Objectives

- **Focus**
- Data modelling (feasibility study recommendation 1)
  
- **Phase 2 goals**
- Investigate harmonisation of research outcomes reporting
  - Reporting fields and vocabularies
  - CERIF mappings
  - Understand relationship to institutional data
  
- Practical demonstrators and tools
- Business case for harmonisation
- Sustainability
  - Inputs to harmonisation and standardisation
  - Dissemination and stakeholder engagement

# Towards a Core Information Reporting Model

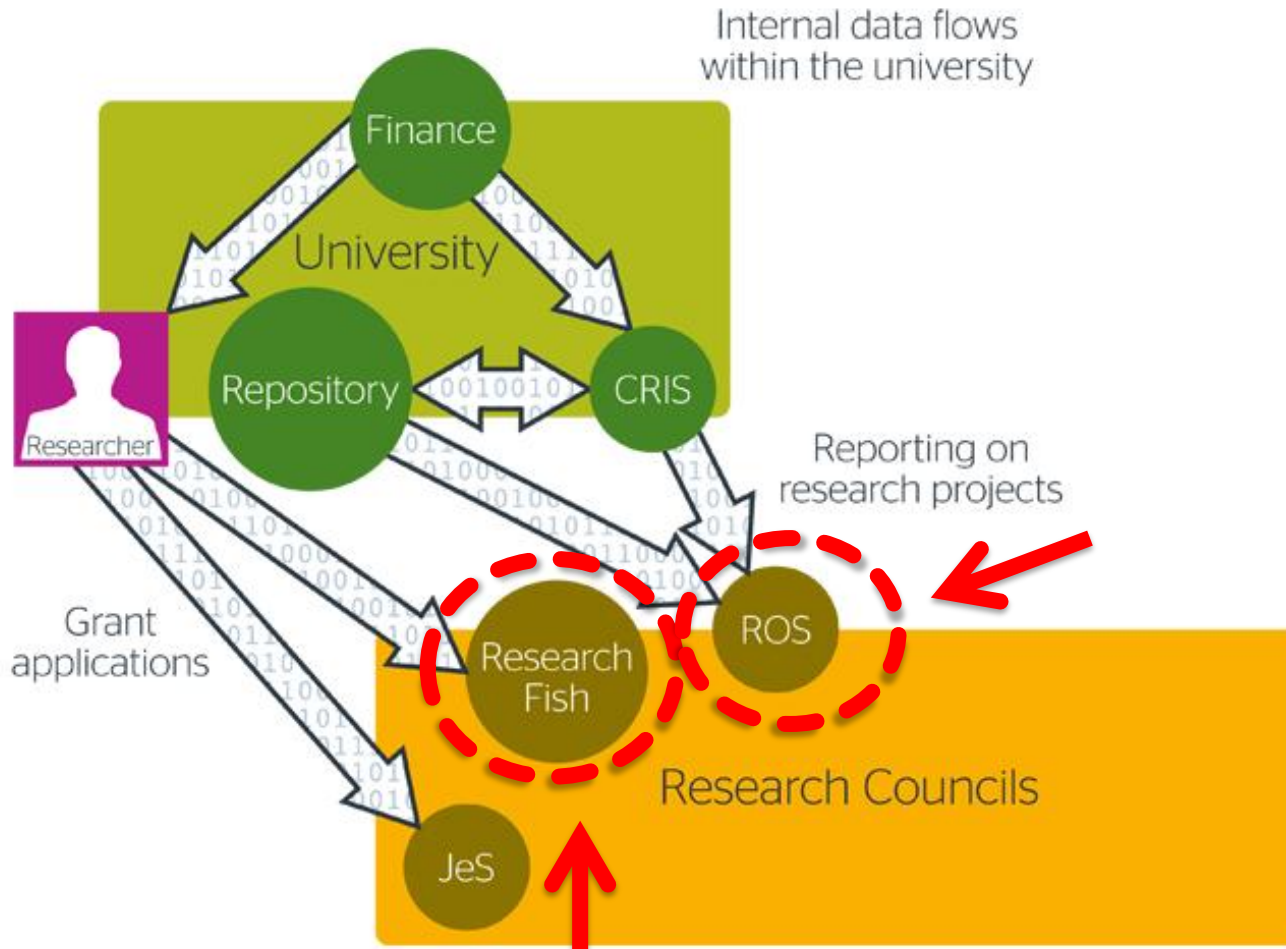

**„Institution submits report to funder“**

# Data Flows between Universities and the UK Research Councils

# Data Flows between Universities and the UK Research Councils

# Data Flows between Universities and the UK Research Councils

## Data Flows between Universities and the UK Research Councils

# UKRISS Modeling Approach

## 1. Bottom-Up Analysis

- a. ROS (ROS) objects and fields
- b. ResearchFish (RF) objects and fields

## 1. Consulting Best Practices

- a. MICE; REF; DESCRIBE; CRISPool, etc.
- b. **Essential:** “Theory-building and logic-modelling is essential to establish causal inference in evaluation.”  
(Final Project Report „DESCRIBE“:  
[http://www.exeter.ac.uk/media/universityofexeter/research/inspiringresearch/describeproject/pdfs/2013\\_06\\_04\\_DESCRIBE\\_Final\\_Report\\_FINAL.pdf](http://www.exeter.ac.uk/media/universityofexeter/research/inspiringresearch/describeproject/pdfs/2013_06_04_DESCRIBE_Final_Report_FINAL.pdf))

## 1. Top-Down Use-Case driven Modeling

- a. “institution submits report to funder”

# Results: Bottom-up Analysis (object-harmonisation)

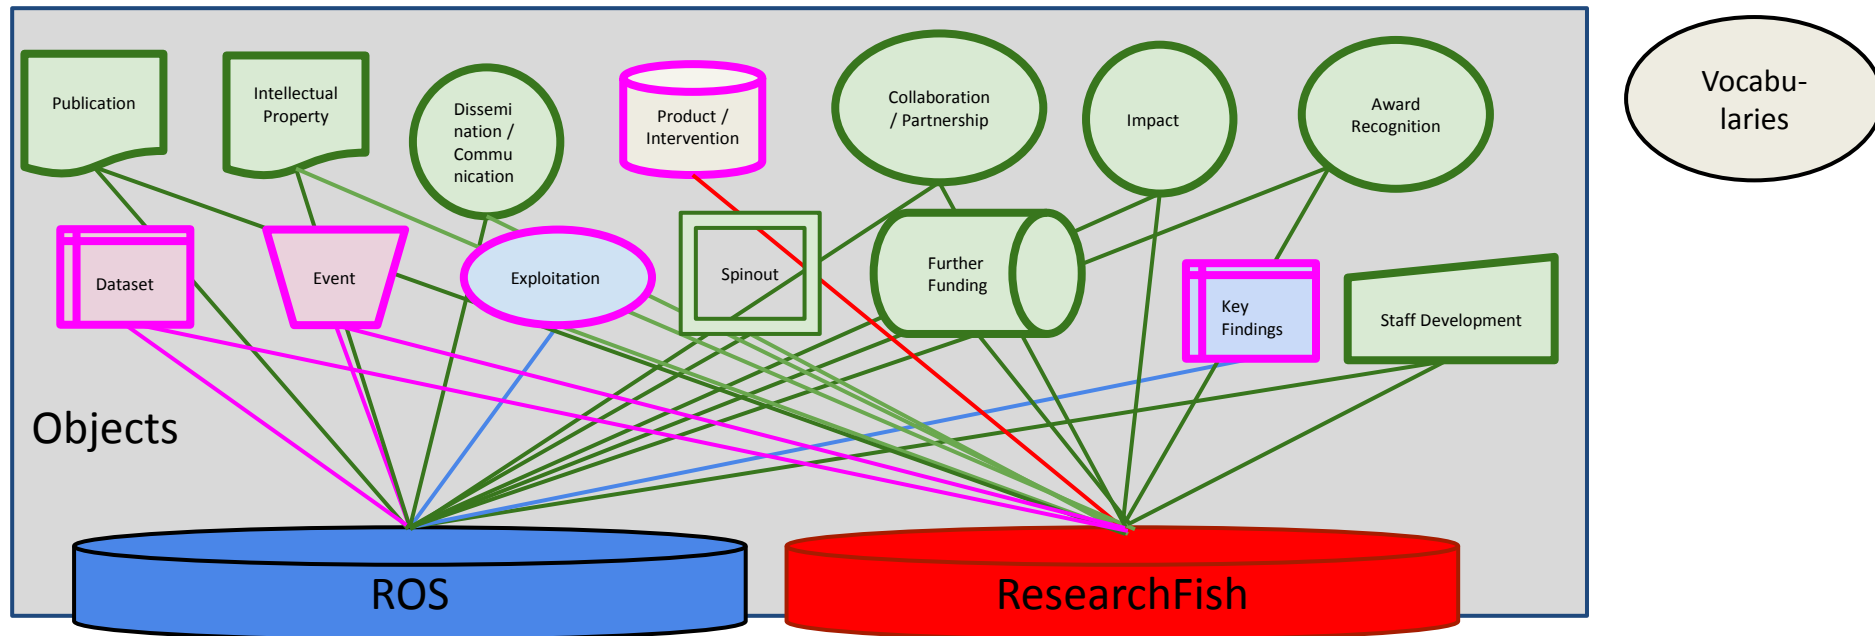

## Current Harmonisation

- Objects (e.g. Publication; IP; Partnerships, etc.)
- via e.g. Mappings to UKRISS Model

## Potential Harmonisation

- Objects (e.g. Dataset; Event; Exploitation; Key Findings; Product/Intervention)
- via e.g. Extension assigning Objects to the UKRISS Model

# Results: Bottom-up Analysis (field-harmonisation)

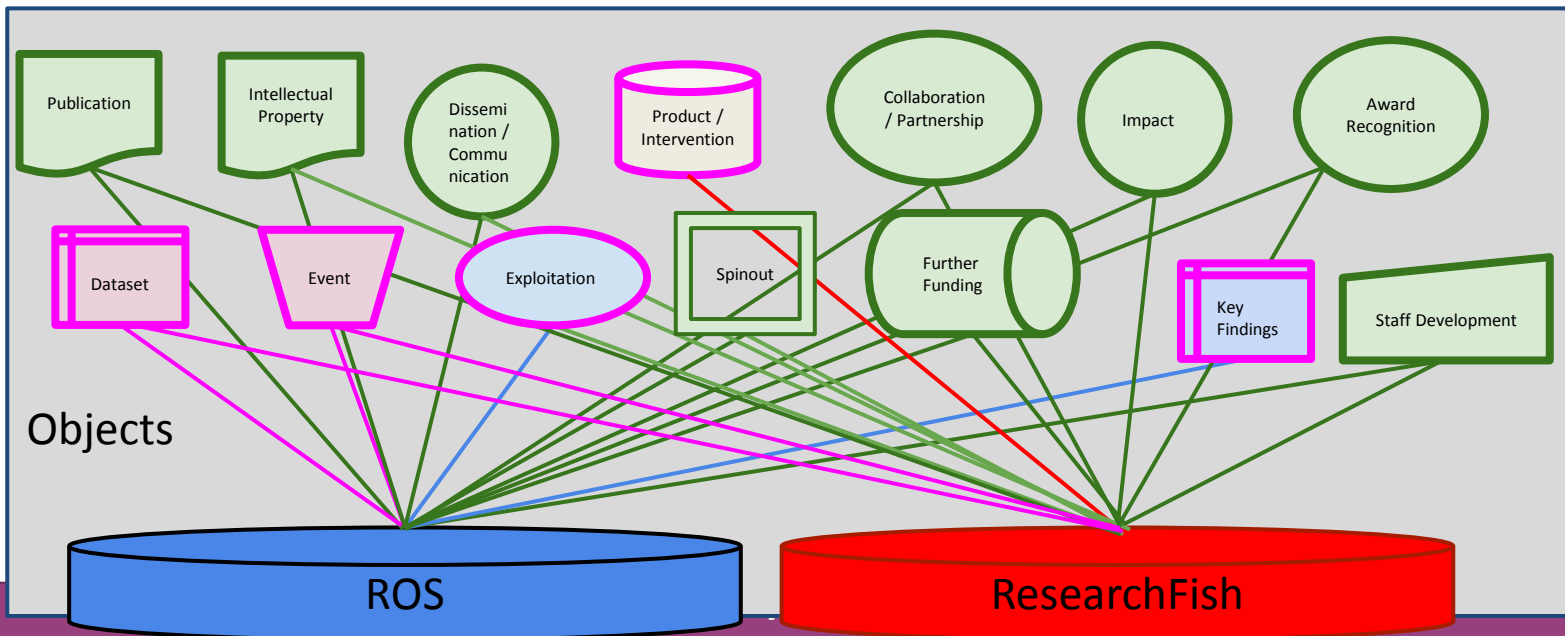

## Current Harmonisation

- Semantic Similarity such as e.g.
  - RF: “Provide a short name/title for this output.”
  - ROS: “Series Title”

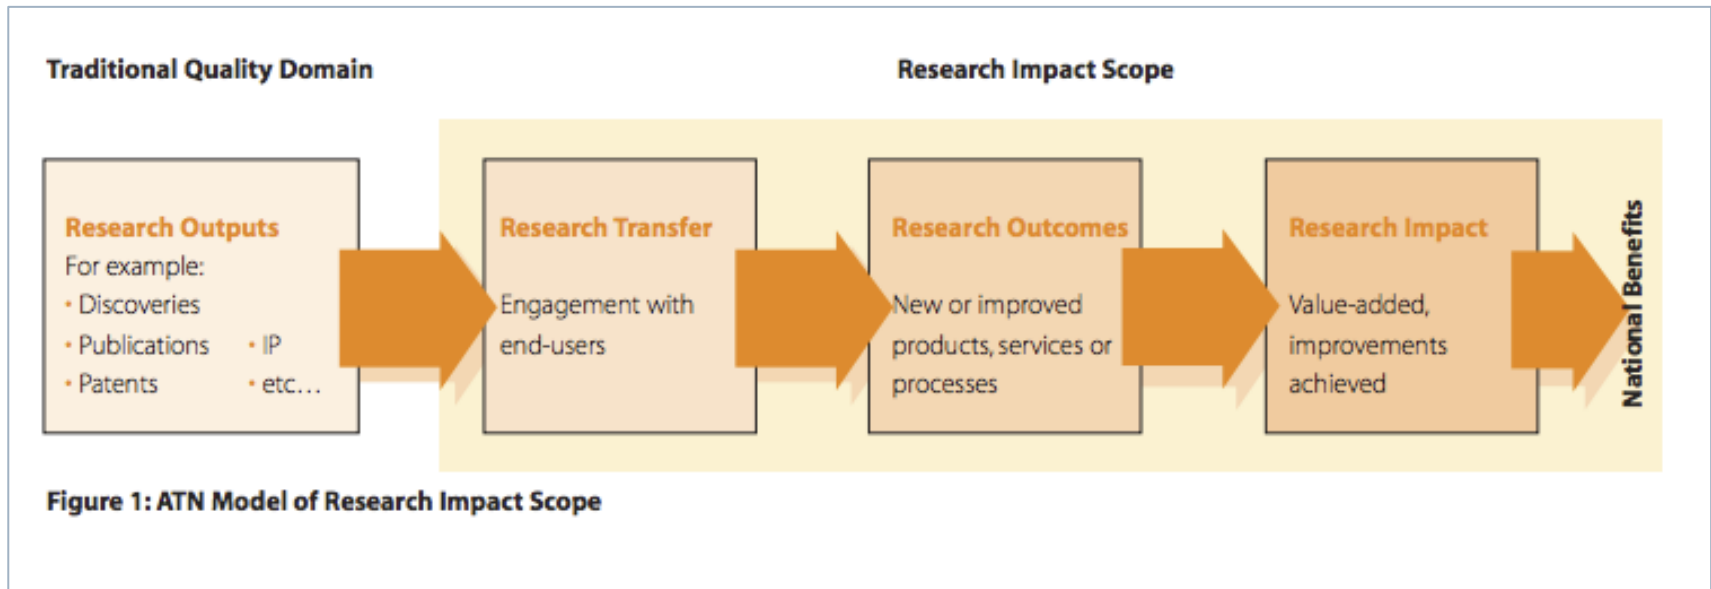

## Potential Harmonisation

- Semantic Similarity through extensions such as e.g.
  - Mapping to UKRISS:Output Types (via ROS/RF Mappings)
  - Extensions such as UKRISS IDs (e.g. OrgID; ORCID, etc).

# UKRISS Modeling Approach

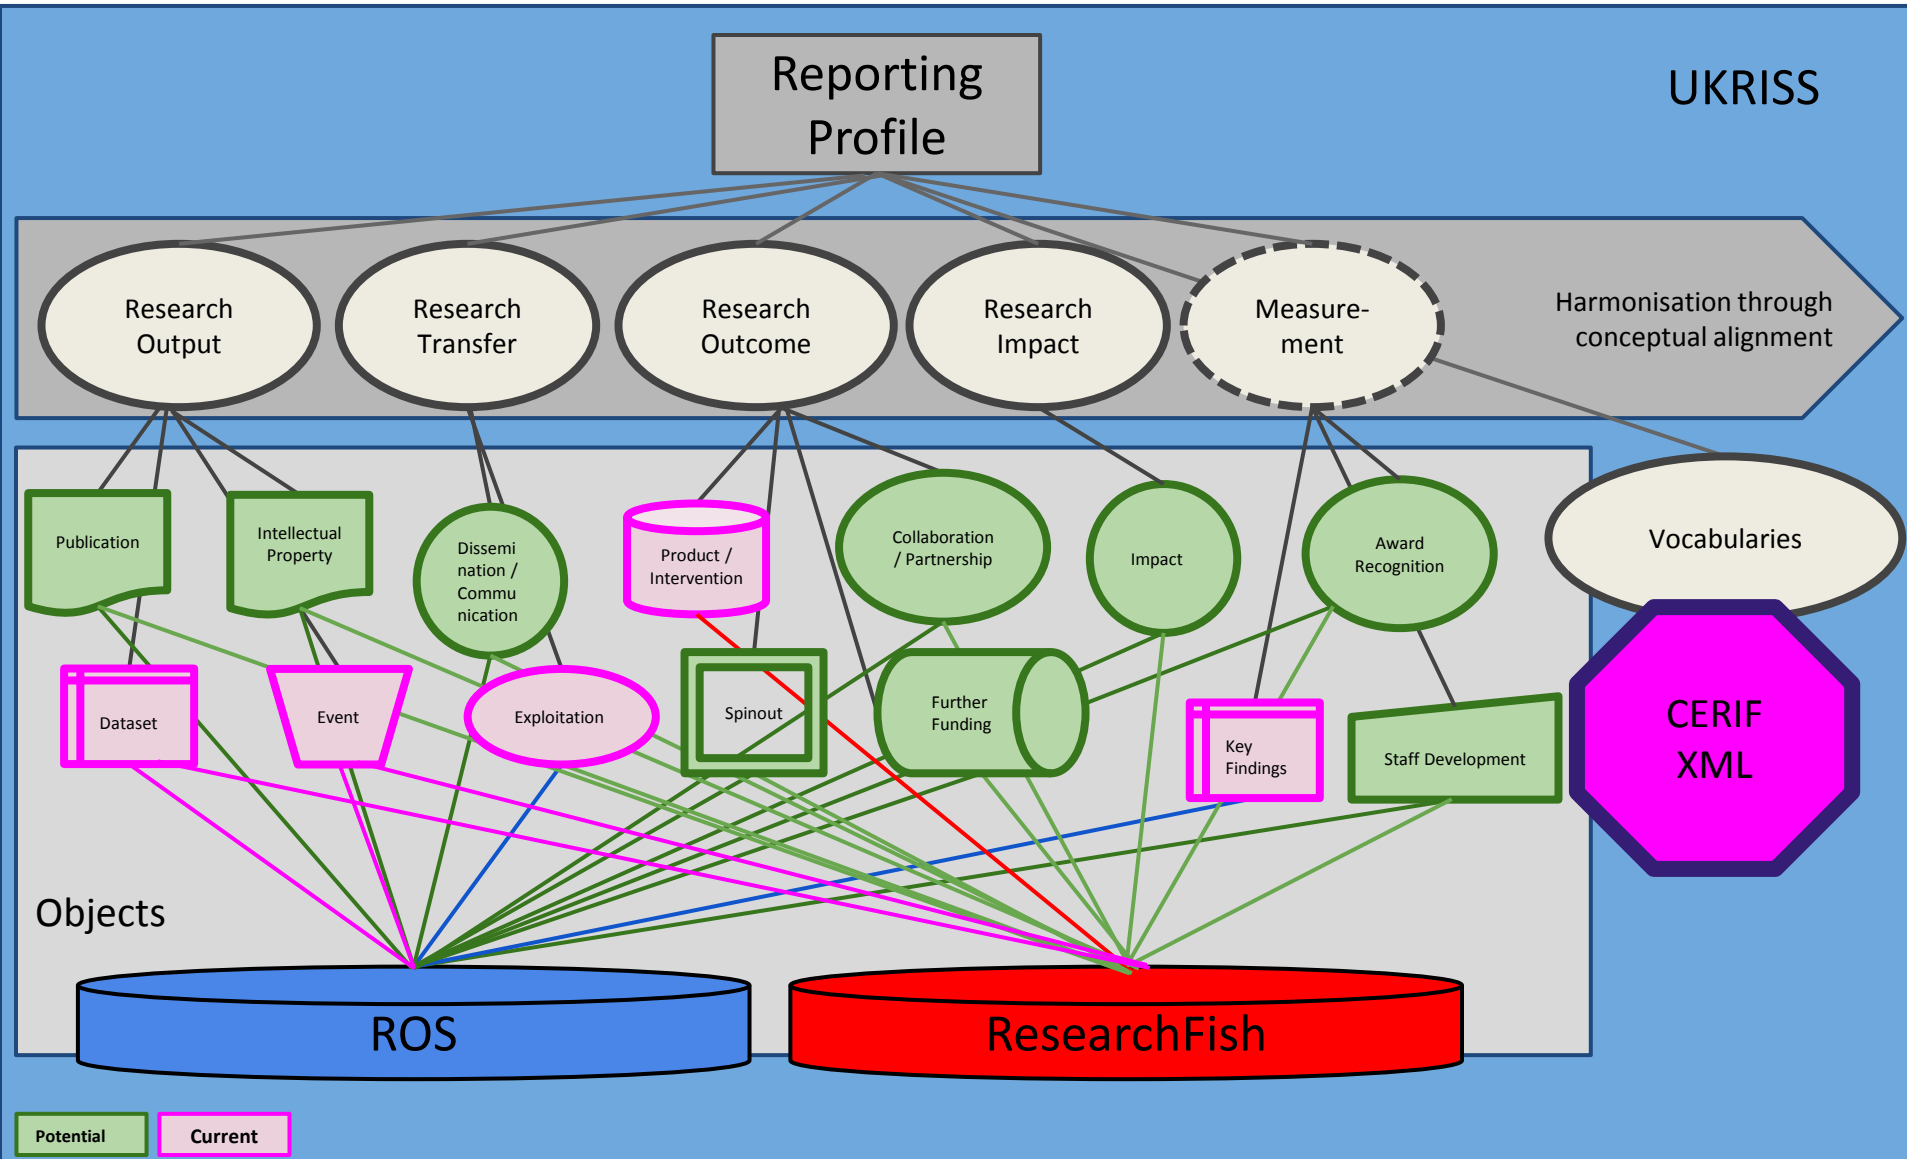

Following Best Practice - Recommend a higher level overarching Reporting Model as introduced in e.g.: “Measuring the Impact of Research” (2007)\*

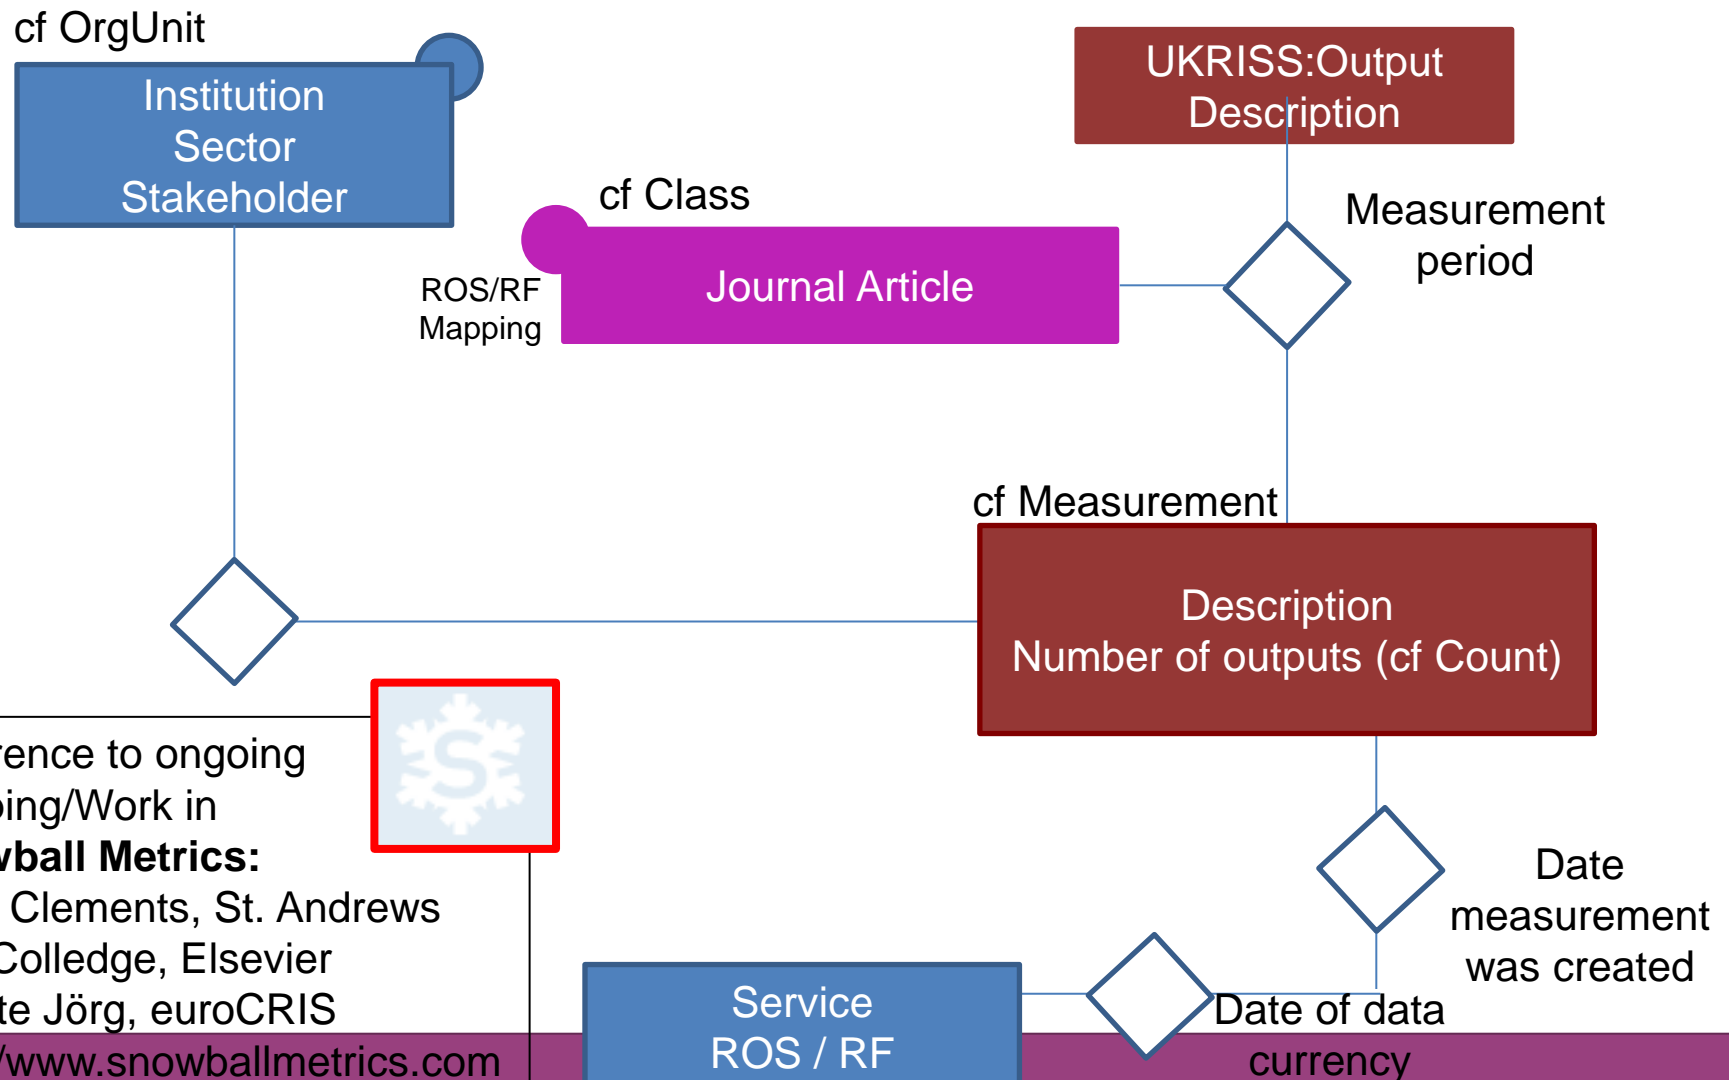

ATN = Australian Technology Network of Universities, which includes Curtin University of Technology, University of South Australia, RMIT University, University of Technology, Sydney and Queensland University of Technology

Mathias Riechert, IFQ

## Research Information Standards Machine Anatomy in UK and Germany

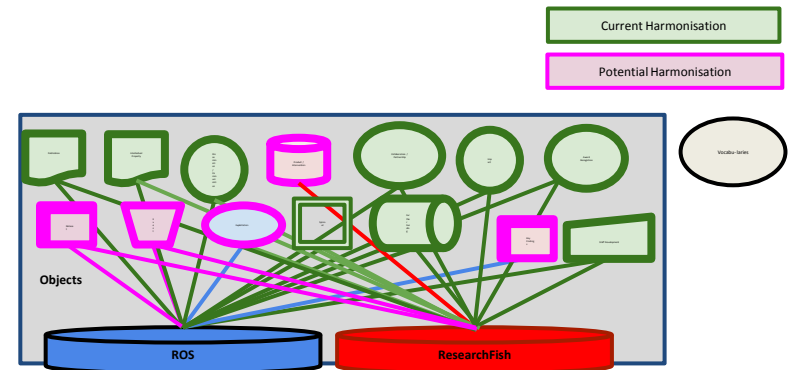

Annual CASRAI International Conference  
Ottawa, October 16-18, 2013

**Mathias Riechert**, Institute for Research Information and Quality Assurance (IFQ), Berlin, GER  
**Brigitte Jörg**, euroCRIS, EU / CASRAI, INT

# UKRISS at ReConnect13 (Ottawa)

- Publication ✓
- Intellectual Property
- Product/Intervention
- Spin-Out
- Collaboration/Partnership
- Further Funding ✓
- Staff Development ✓
- Dissemination/Communication
- Exploitation
- Award / Recognition ✓
- Key Findings
- Impact
- Dataset
- Event
- *Underlying Vocabularies have not been considered here.*

✓ = **UK – GERMANY)**  
**Overlap**

# Remaining Work

- Further Model Verification via Data
- Complete Formal CERIF Mapping (XML)
  - ROS
  - RF
  - (HEBCIS)
- Definition of Vocabulary Boundaries
- Final Report End of December

# Summary - Conclusion

- **Need for Harmonisation is obvious**
  - National
  - International
- **UKRISS Main Destination of Results**
  - CASRAI UK Working Group on Contributions and OA Reporting
- **Long-term Governance Model needs to be discussed**
- **Business Case / Efficiency**
  - Re-Usability demonstrated
  - Standardized Interchange possible
  - Harmonisation (Alignment) required incrementally
- **Need: Agreed Requirements (agreed questions)!!**
